MagAdd

Component for the production of magnesium compounds – MagAdd[®] 0-300

Description	Application	
Homogeneous white odorless powder without impurities. Produced from selectively mined natural magnesium hydroxide (ground brucite), by drying, milling and classifying.	Used as a source of magnesium for production of magnesium compounds	
Properties	Indicator	Content
	MgO/Mg(OH) ₂ , %, min.	60.0/87.0 min.
	CaO, %, max.	3.0 max.
	SiO ₂ , %, max.	3.0 max.
	Fe ₂ O ₃ , %, max.	0.5 max.
	Loose Bulk density, kg/m ³	700 min.
	Humidity, %	1.0 max.
	Particle Size Distribution, %: >300 micrones	10.0 max.
Product appearance	White, fine, homogeneous powder	
Storage	The shelf life is 5 years from date of manufacturing, while maintaining the tightness of packing	
Packaging	In bulk, in polypropylene bags (20 and 40 kg), big bags	
Safety	Refers to low-hazard substances; fire- and explosion-proof, non-toxic	
Transportation	Transported by all modes of transport in accordance with the rules of transportation of goods that operates in this mode of transport
